

Get it, and play it!

**Your students
already play the
24[®] Game on
First In Math[®], now
they can play it
anywhere!**

High Tech.

The FIRST IN MATH[®] ONLINE program you already know & love harnesses the power of digital-gaming to help students embrace math and learn to work through challenges, and features the 24[®] Game as an integral part our comprehensive content that covers all domains of math.

No Tech.

Loved by teachers and students since 1988, the 24[®] GAME is part of First In Math[®] for a reason. Beyond strengthening procedural fluency, 24[®] Game expands strategic thinking and adaptive reasoning abilities, laying the groundwork for higher-order skills such as Computational Thinking! Knowing the answer is always 24 alleviates a classic brand of math anxiety—getting the right answer—and gives students confidence in their problem solving and communication abilities, creating successful, life-long learners.

Zero Stress.

Playing 24[®] Game in class is great fun for everyone! There are nine mathematically-diverse editions ranging from simple Add/Subtract to Algebra/Exponents. See list on the back of this sheet for special, discounted pricing and suggested age ranges for each edition.
