What is First In Math?

- Our school chose this outstanding educational tool to help students practice and master mathematics skills.
- Your child may log on to the First In Math® website — firstinmath.com — with their User ID & Password at any time, on any device with Internet access.

"I wanted to thank you for the opportunity for Reidenbaugh Elementary to shine. My son continues to work on First in Math every day. Each day he tells me about his point total for the day and the week. He's shared that he's trying the fifth through seventh grade problems, delighted that he has found some success with these even though he's in fourth grade. The First in Math site is just wonderful for someone like him who really loves math and desires the extra stimulation and challenge."

Dr. Christine Jurasinski
Parent, fourth grade student at Reidenbaugh Elementary School

Why use First In Math?

- **First in Math® online activities increase problem-solving and critical-thinking abilities and boost basic math skills.**
- **Children using this website show consistent improvement in math scores — from those needing to advance their skills, to the top students.**

“There is such value in this program. Students work at their own pace and set their own personal goals. It allows kids who need a little extra help a chance to work on their skills and it allows kids who excel to go beyond what is taught in the classroom.”

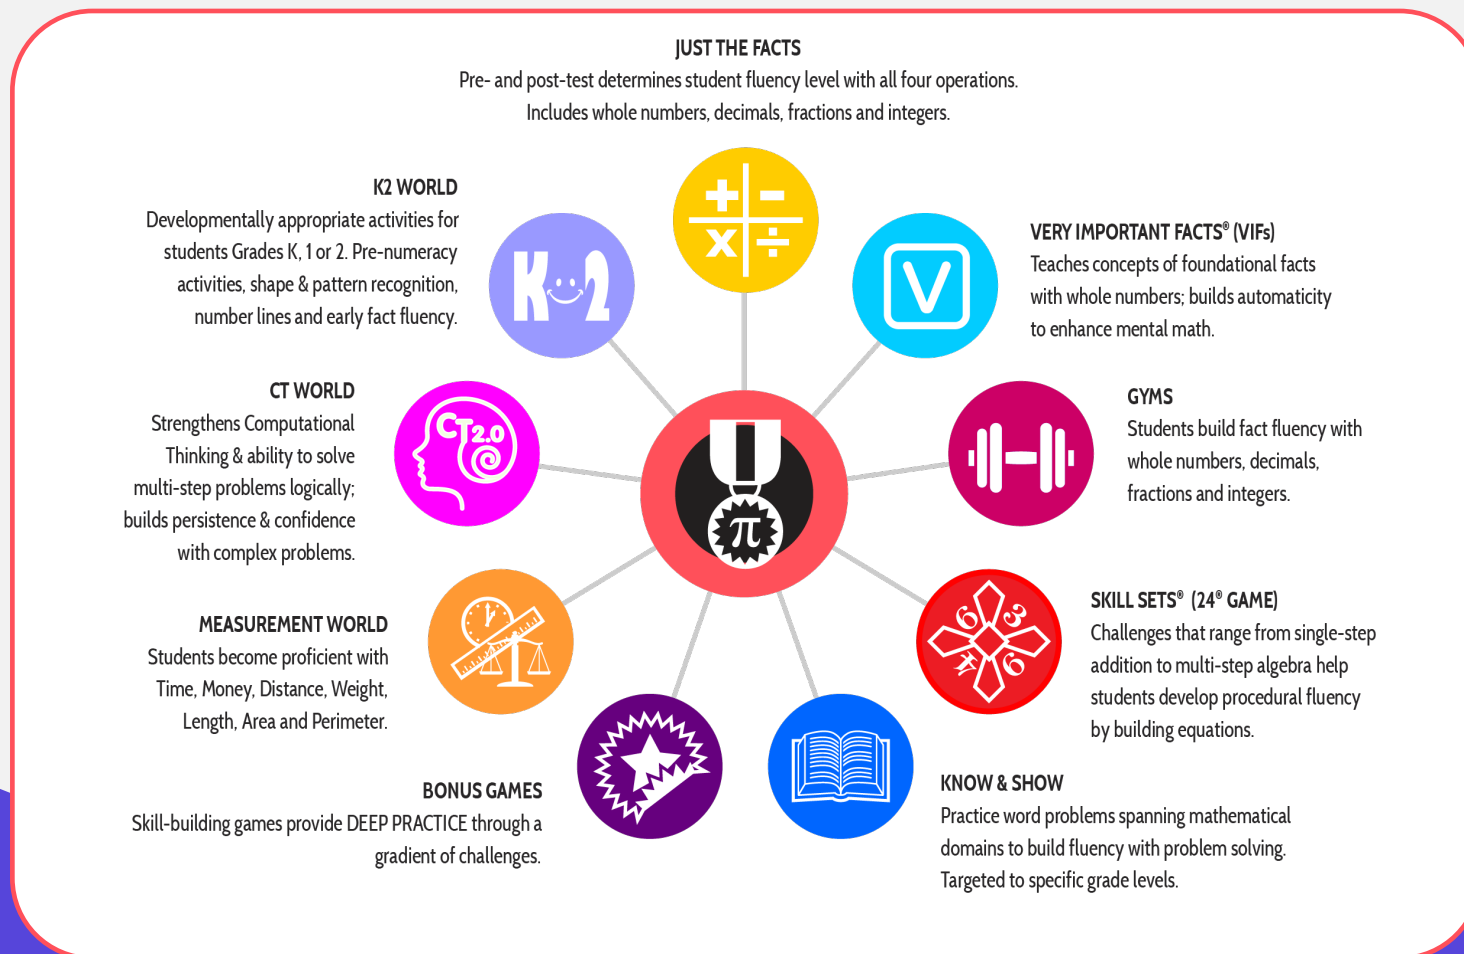

Dr. Frank Fischel
Principal of Mountain View Elementary School, Flanders, NJ

The PLAYER HUB offers choices

- Guided by teachers, kids can choose many ways to learn & practice math.

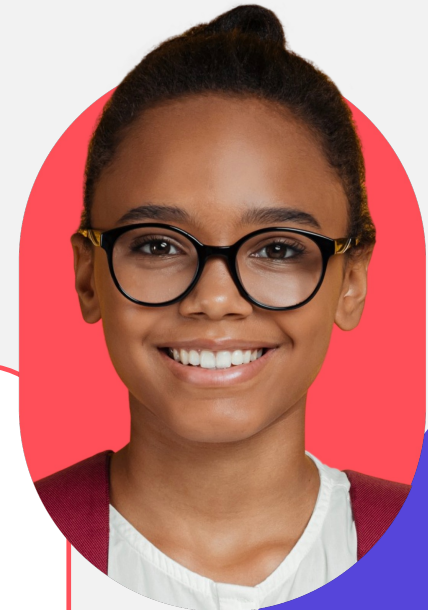

Goals, Automatic Awards & Achievement

- An 'Automatic Awards' system encourages students and spurs academic achievement!
- Students receive Digital Ribbons & Certificates in their red Notifications Envelope for skill levels and games successfully completed — includes all module areas and Player Of The Day!

[Automatic rewards provide encouragement \(:38\)](#)

First in Math Goals Index

The goals index is an overall measure of performance on First in Math in four categories: Activity, Fact Fluency, Word Problem Fluency, and Procedural Fluency. Hover over the quadrants for more information.

Activity - Sticker Count

Stickers Earned

Fact Fluency - Gyms

Whole Numbers

Fractions

Decimals

Integers

Fractions and Decimals

Add

Subtract

Multiply

Divide

Procedural Fluency - Skill Sets

Math + Family = Fun!

- For every student enrolled we provide one FREE FamilyLink® User ID/Password to share with a family member or friend!
- Encourage your child to play a few minutes each day to greatly increase their math skills, as well as their overall academic confidence and performance.

“How many times have you heard a child say they are not good at math? Children aren’t born ‘good’ or ‘bad’ at math — achieving success in math takes practice, like any other skill. First In Math is a proven math-practice tool that uses game-style activities coupled with immediate feedback to boost confidence and elevate learning. For decades, it has helped more than 35 million children worldwide become fearless mathematicians. I invite your family to join the fun!”

Robert Sun
Inventor of the First In Math® Online Program and the 24® Game
